Summary

Software Engineer with experience in full-stack web development using React, Node.js, Express, and C#. Skilled in building scalable web applications, optimizing legacy systems, and mentoring aspiring developers through hands-on technical instruction. Experienced with REST APIs, database systems, and modern JavaScript frameworks. Passionate about building impactful software solutions and solving real-world technical challenges.

Core Technologies

React • Node.js • Express • C# • C • JavaScript • REST APIs • MongoDB • SQL • Git • HTML5 • CSS3 • Flutter

Education

Vocational Training Development Institute

Jamaica

BACHELOR OF SCIENCE IN INFORMATION & COMMUNICATION TECHNOLOGY (SOFTWARE ENGINEER MAJOR)

25/09/2016 – 25/09/2021

- Developed a diverse skill set in software engineering through a Bachelor of Science in Information & Communication Technology program.
- Designed and implemented console applications in C, desktop applications in C# and Java, and web applications with PHP, HTML, CSS and JavaScript, showcasing proficiency in multiple programming languages and platforms.
- Implemented a Cloud Computing environment utilizing Virtual Box as a hypervisor on a Windows 10 host machine to deploy and manage virtual machines. Configured virtual machines to communicate effectively using Thunderbird as the email service client, showcasing practical skills in networking and virtualization.
- Completed advanced mathematics courses such as Calculus and Discrete math to enhance problem-solving skills essential for software development.

Udemy

Online

COMPLETE REACT DEVELOPER (W/ Redux, Hooks, GraphQL) by Andrei Neagoie and Yishua Zhang

05/2022 – 02/2023

- Built a full-stack e-commerce application using the MERN stack, implementing modern React tools including Redux, Hooks, Suspense, Router, GraphQL, Context API, Firebase, Redux-Saga, and Stripe.

Work Experience

Jacksonville Job Corps via (Eckerd Youths and Net. America)

Jacksonville, Florida

INFORMATION TECHNOLOGY INSTRUCTOR

March 2025 – present

- Design course based on CompTIA A+ course objectives
- Aid with the development of Microsoft excel formulas that analyze student stats.
- Facilitate and guide students through course material that leads them to be certified in:
- CompTIA A+

Facilitate and guide students through course material that leads them to be certified in:

- Cyber Security (ISC2CC)
- Data Analytics (CompTIA Data+)
- Database Administration (CompTIA DataSys+)

Mount Olivet Skills Training Center (HEART Trust NSTA)

Christiana, Manchester

WEBSITE DEVELOPER INSTRUCTOR

06/09/2021 – present

- Guided students through hands-on projects to develop responsive websites, incorporating HTML, CSS, Bootstrap, JavaScript, and SQL to equip them with essential skills for building dynamic web applications.

Dreamtech Labs LLC (Dreamtech Academy)

San Diego, CA

SOFTWARE ENGINEER AND COURSE COORDINATOR

01/06/2022 – 31/12/2022

- Assisted in designing and executing three comprehensive Website Development Bootcamps, covering Introduction to Website Development, Full Stack Website Development, and MERN Stack Website Development, resulting in a significant increase in student enrollment and course completion rates.
- Conducted hands-on training sessions to mentor students in mastering the complete web development stack, from front-end technologies like HTML, CSS, and React.js to backend frameworks such as Node.js and Express.js, ensuring a comprehensive understanding of modern web application development.
- Designed and developed a comprehensive hotel management application using React, Node.js, Express, and MongoDB, serving as a hands-on educational tool for students at Dreamtech Academy to gain practical experience in building complex web applications.

Orbus Technologies

Kingston, Jamaica

- Enhanced functionality and performance of legacy software built on Sage CRM by implementing new features, resolving errors, and optimizing SQL queries, utilizing C#, XML, JavaScript, HTML, and CSS.
- Setup of robust software development and test environments at Orbus Technologies, ensuring seamless collaboration and efficient testing processes for the engineering team.

RoadA

Manchester, Jamaica

SOFTWARE ENGINEERING INTERN-(INTERNSHIP TO COMPLETE STUDIES)

01/06/2021 – 25/08/2021

- Designed and developed a user-friendly mobile application using Flutter to provide real-time navigation assistance and safety alerts for both local and international road users at RoadA, improving user experience and road safety.
- Implemented Git branching strategies and code review processes to optimize collaboration and version control for RoadA's Flutter source code, ensuring seamless integration and efficient development workflows.

Technical Skills

Languages

C#, JavaScript, SQL, PHP, C

Frontend

React.js, HTML5, CSS3, SCSS

Backend

Node.js, Express.js, REST APIs

Databases

MongoDB, SQL

Tools

Git, GitHub, Visual Studio, Visual Studio Code, Netlify, Vercel, Git workflows

Development Concepts

REST API, MVC architecture, Agile Development, Api integration, Responsive UI, Debugging

Mobile Development

Flutter

Projects

Developer portfolio

Developed a dynamic developer portfolio website to showcase my skills, projects, and experience, enabling visitors to easily connect with me for potential opportunities.

Created with: ReactJs, JavaScript, Netlify, Jsx, HTML, Scss, Css, EmailJs, REST API Visual Studio Code, GitHub <https://heltondevportfolio.netlify.app>

Capsify

Developed a c# console application that changes lower case letter to uppercase letters.

Created with C# programming language and its console app project interface

C_Thru

Developed a keyboard Input Logging application (Security Research Project)

Created with C# programming language and its console app project interface

ScriptSpeak

A web application that uses Javascript Web Speech API, HTML, CSS to translate text into speech.

HEXA_CRYPT

A JavaScript URI encoder and decoder program. It converts base 64 encoded strings into a normal decoded strings as well as encoding a normal sting for privacy or security reasons.
